

Contents

I	General Pathology of Cancer	1
5	Criteria of malignancy and diagnostic pitfalls	3
5.1	Large cell lymphoma after chemotherapy, no therapy effect.	4
5.2	Osteosarcoma after chemotherapy.	5
5.3	Gastrointestinal stromal tumor(GIST) after Gleevec therapy,	6
5.4	Breast carcinoma in situ after radiochemotherapy.	7
5.5	Neuroblastoma after chemotherapy.	8
5.6	Post-radiation squamous cell carcinoma, grade 3.	9
5.7	Post-radiation squamous cell carcinoma, grade 3, cystectomy specimen.	10
5.8	Squamous cell carcinoma, post irradiation.	11
5.9	Breast cancer after neoadjuvant chemotherapy.	12
5.10	Large cell NHL after chemotherapy.	13
5.11	Osteosarcoma after chemotherapy.	14
5.12	Osteosarcoma after chemotherapy.	15
5.13	Wilms tumor nephrectomy specimen after radiochemotherapy.	16
5.14	PNET after radiochemotherapy.	17
5.15	GIST after therapy,	18
5.16	Breast after chemotherapy	19
5.17	Osteosarcoma, marked chemotherapy effect.	20
5.18	Lymphoma, marked therapy effect.	21
5.19	GIST after prolonged Gleevec therapy, marked therapy effect.	22
5.20	Metastatic breast carcinoma in lymph node after therapy,	23
5.21	Thymoma after therapy.	24
5.22	Marked therapy effect of germ cell tumor.	25

II	Systemic Pathology of Cancer	27
9	Tumors of upper respiratory tract	29
9.1	Pigmented neuroectodermal tumor of infancy.	30
9.2	Osteoma of maxilla.	31
9.3	Inverted Schneiderian papilloma, histology.	32
9.4	Ossifying fibroma, histology.	33
9.5	Myxoma, histology.	34
9.6	Schneiderian carcinoma (transitional or non-keratinizing squamous carcinoma), histology.	35
9.7	Adenoid cystic carcinoma.	36
9.8	Sinonasal adenocarcinoma, histology.	37
9.9	Sinonasal melanoma, histology.	38
9.10	Olfactory neuroblastoma, histology.	39
9.11	NK/T cell lymphoma, nasal type (formerly angiocentric lymphoma and midline lethal granuloma).	40
9.12	Embryonal rhabdomyosarcoma, histology.	41
9.13	Mesenchymal chondrosarcoma.	42
9.14	Giant cell lesion (formerly giant cell reparative granuloma).	43
9.15	Wegner granulomatosis.	44
9.16	Ectopic glial tissue in nasal cavity (formerly so-called nasal glioma).	45
9.17	Rhinoscleroma, histology.	46
9.18	Nasopharyngeal carcinoma, histology.	47
9.19	Angiofibroma, histology.	48
9.20	Diffuse large B-cell non-Hodgkin lymphoma (DLBCL), histology.	49
9.21	Chordoma in nasopharynx, histology.	50
9.22	Carcinoma of hypopharynx, gross features.	51
9.23	Supraglottic carcinoma, gross features.	52
9.24	Squamous papilloma of the larynx (HPV-related), histology.	53
9.25	Moderate squamous dysplasia, histology.	54
9.26	Carcinoma in situ of larynx, histology.	55
9.27	Invasive squamous cell carcinoma of larynx, histology.	56
9.28	Papillary variant of squamous cell carcinoma, histology.	57
9.29	Glottic carcinoma of RT. vocal cord.	58
10	Tumors of lower respiratory tract	59
10.1	Lung carcinoma, gross features.	60
10.2	Lung carcinoma, gross features.	61
10.3	Squamous cell carcinoma, histology.	62
10.4	Adenocarcinoma, histology.	63
10.5	Bronchioloalveolar carcinoma, histology.	64

10.6	Adenosquamous carcinoma, histology.	65
10.7	Large cell carcinoma, histology.	66
10.8	Small cell carcinoma, histology.	67
10.9	Atypical precursor lesions.	68
10.10	Inflammatory myofibroblastic tumor.	69
10.11	Pulmonary blastoma, histology.	70
10.12	Typical carcinoid tumor.	71
10.13	Atypical carcinoid tumor, histology.	72
10.14	Marginal zone lymphoma (MALT-type).	73
10.15	Solitary extramedullary plasmacytoma.	74
10.16	Pleural mesothelioma.	75
10.17	Mesothelioma, histology of a microcystic variant.	76
10.18	Mesothelioma, confirmatory measures.	77
10.19	Mesothelioma.	78
10.20	Reactive mesothelial hyperplasia, histology.	79
10.21	Mesothelioma, pleural fluid cytologic features.	80
10.22	Carcinoma, pleural fluid cytologic features.	81
10.23	Solitary fibrous tumor (formerly fibrous histiocytoma).	82
11	Tumors of the mediastinum	83
11.1	Thymic hyperplasia.	84
11.2	Gross features of thymoma.	85
11.3	Type A thymoma.	86
11.4	Type AB thymoma.	87
11.5	Type B1 thymoma (lymphocyte-rich), low (A) and high power (B).	88
11.6	Type B2 thymoma, low (A) and high power (8).	89
11.7	Type B3 thymoma, (epithelium-rich).	90
11.8	Organotypic features of thymoma.	91
12	Tumors of oral cavity	93
12.1	Leukoplakia.	94
12.2	Erythroplasia.	95
12.3	Lichen planus.	96
12.4	Microinvasive carcinoma.	97
12.5	Squamous cell carcinoma of the lip.	98
12.6	Squamous cell carcinoma of the tongue.	99
12.7	Invasive squamous cell carcinoma (grade 2).	100
12.8	Verrucous squamous cell carcinoma of oral cavity	101
12.9	Granular cell tumor, histology.	102

12.10	Necrotizing sialometaplasia.	103
12.11	Pleomorphic adenoma of parotid gland.	104
12.12	Pleomorphic adenoma, histology.	105
12.13	Pleomorphic adenoma, metaplastic changes.	106
12.14	Pleomorphic adenoma, recurrent.	107
12.15	Warthin tumor, gross features.	108
12.16	Warthin tumor, histology.	109
12.17	Oncocytoma, histology.	110
12.18	Basal cell adenoma, histology.	111
12.19	Canalicular adenoma, histology.	112
12.20	Papillary cystadenoma, histology.	113
12.21	Benign myoepithelioma, histology.	114
12.22	Mucoepidermoid carcinoma, low grade.	115
12.23	Mucoepidermoid carcinoma, high grade.	116
12.24	Adenoid cystic carcinoma, histology of solid variant.	117
12.25	Adenoid cystic carcinoma, histology.	118
12.26	Acinic cell carcinoma, histology.	119
12.27	Carcinoma ex pleomorphic adenoma.	120
12.28	Carcinosarcoma, histology.	121
12.29	Polymorphous low-grade adenocarcinoma, histology.	122
12.30	Malignant oncocytoma, histology.	123
12.31	Malignant myoepithelioma, histology.	124
12.32	Clear cell carcinoma, histology.	125
12.33	Basal cell adenocarcinoma, histology.	126
12.34	Adenocarcinoma, not otherwise specified (NOS).	127
12.35	Lymphoepithelial lesion of parotid (MALT or Mikulicz disease).	128
12.36	Cementoblastoma, histology.	129
12.37	Ameloblastic sarcoma, histology.	130
12.38	Ameloblastoma, radiographic picture.	131
12.39	Ameloblastoma, gross features.	132
12.40	Ameloblastoma, histology.	133
12.41	Adenomatoid odontogenic tumor, histology.	134
12.42	Calcifying epithelial odontogenic tumor (Pindborg tumor), histology.	135
12.43	Dentinogenic ghost cell tumor, histology.	136
12.44	Ameloblastic carcinoma, histology.	137
12.45	Ameloblastic fibroma.	138
12.46	Ameloblastic fibro-odontoma.	139
12.47	Complex odontoma, histology.	140
12.48	Compound odontoma.	141

12.49 Giant cell lesion (formerly giant cell reparative granuloma).	142
12.50 Giant cell lesion, histology.	143
12.51 Ossifying fibroma of mandible.	144
12.52 Ossifying fibroma, histology.	145
12.53 Osteosarcoma of mandible, gross features.	146
12.54 Burkitt's lymphoma.	147

13 Tumors of gastrointestinal tract 149

13.1 Barrett esophagus, histology.	150
13.2 Esophageal carcinoma, gross features.	151
13.3 Esophagus, invasive squamous cell carcinoma, histology.	152
13.4 Stomach, Mntrier's disease, histology.	153
13.5 Gastric antrum, Helicobacter Pylori, Giemsa stain.	154
13.6 Stomach, intestinal metaplasia and dysplasia, histology.	155
13.7 Stomach, adenocarcinoma, ulcerative type, gross features.	156
13.8 Stomach, adenocarcinoma, diffuse linitis plastica type, gross feature.	157
13.9 Stomach, adenocarcinoma, intestinal type of Lauren, histology.	158
13.10 Stomach, adenocarcinoma, diffuse type of Lauren, histology.	159
13.11 Small intestine, hamartomatous polyp of Peutz-Jeghers syndrome, histology.	160
13.12 Rectum, solitary juvenile polyp, histology.	161
13.13 Colon, inflammatory pseudopolyps of ulcerative colitis.	162
13.14 Rectum, lymphoid polyp, histology.	163
13.15 Colon, hyperplastic polyp.	164
13.16 Rt. colon, sessile serrated adenoma/polyp (SSA/P), histology.	165
13.17 Colon, adenomatous polyp (adenoma), histology.	166
13.18 Sigmoid, villous adenoma.	167
13.19 Colon, carcinoma in adenomatous polyp, histology.	168
13.20 Colon, familial adenomatous polyposis (FAP), gross features.	169
13.21 Colon, adenocarcinoma, ulcerative type, gross features.	170
13.22 Colon, adenocarcinoma, stricture type, gross features.	171
13.23 Colon, gland-forming adenocarcinoma, histology.	172
13.24 Colon, mucinous adenocarcinoma, histology. Alcian blue stain.	173
13.25 Anal canal, squamous cell carcinoma, gross features.	174
13.26 Anal canal invasive squamous cell carcinoma, histology.	175
13.27 Anal canal, basaloid carcinoma (so-called cloacogenic carcinoma), histology.	176
13.28 Adenocarcinoma of anal canal, gross features.	177
13.29 Anal canal, Paget disease, histology.	178
13.30 Anal canal, malignant melanoma, gross features.	179
13.31 Anal canal, melanoma, histology.	180

13.32 Ileum, neuroendocrine tumor (carcinoid), gross features.	181
13.33 Appendix, carcinoid tumor, gross features.	182
13.34 Colon, carcinoid tumor, gross features.	183
13.35 Neuroendocrine tumors, various histologic patterns.	184
13.36 Neuroendocrine tumor with adenocarcinoma differentiation (adenocarcinoid), histology.	185
13.37 Stomach, H. pylori-associated chronic active antral gastritis, histology.	186
13.38 Stomach, MALT lymphoma, gross features.	187
13.39 jejunum, immuno-proliferative small intestinal disease (IPSID).	188
13.40 Jejunum, IPSID.	189
13.41 Jejunum, IPSID, tumor stage, gross features.	190
13.42 Caecum, Burkitt lymphoma, gross features.	191
13.43 Small intestine, complicated lymphoma, gross features.	192
13.44 Stomach, gastrointestinal stromal tumor (GIST), gross features.	193
13.45 Rectum, gastrointestinal stromal tumor (GIST), gross features of mural type.	194
13.46 Gastrointestinal stromal tumor (GIST), histology.	195
13.47 Gastrointestinal stromal tumor (GIST), immunoreactivity.	196
13.48 Stomach, penetrating giant ulcer (pseudotumor), gross features.	197
13.49 Jejunum, bilharzial stricture, gross features.	198
13.50 Colon, bilharzial pericolonic mass, gross features.	199
13.51 Colon, bilharzial granuloma, histology.	200
13.52 Rectum, inflammatory stricture, gross features.	201
13.53 Transverse colon and greater omentum, bilharzial mass, gross features.	202
13.54 Pelvic peritoneum, endometriosis, gross features.	203
13.55 Peritoneal endometriosis, histology.	204
13.56 Anterior abdominal wall, endometriosis, secretory pseudodecidual change in stroma, histology.	205
13.57 Greater omentum, disseminated leiomyomatosis.	206
13.58 Peritoneum, pseudomyxoma peritonei, low grade, histology.	207
13.59 Peritoneum, pseudomyxoma peritonei, high grade, histology.	208
13.60 Greater omentum, multiple metastases from colonic carcinoma.	209

14 Hepatobiliary and pancreatic tumors 211

14.1 A virus-related cirrhosis, histology.	212
14.2 Hemochromatosis-associated liver cirrhosis.	213
14.3 Liver cell change (dysplasia), histology.	214
14.4 Hepatocellular carcinoma, gross features.	215
14.5 Hepatocellular carcinoma, gross features.	216
14.6 Hepatocellular carcinoma, histology.	217
14.7 Hepatocellular carcinoma, histology.	218
14.8 Hepatocellular carcinoma, histology.	219

14.9	Hepatocellular carcinoma, fibrolamellar variant.	220
14.10	Hepatocellular carcinoma, histology.	221
14.11	Hepatocellular carcinoma, histology.	222
14.12	Hepatocellular carcinoma, fine needle aspiration cytology.	223
14.13	Focal nodular hyperplasia, histology.	224
14.14	Liver adenoma, histology.	225
14.15	Hepatocellular carcinoma, CT image,	226
14.16	Hepatoblastoma, histology.	227
14.17	Hepatic angiosarcoma, histology.	228
14.18	Liver metastases from gastric carcinoma, gross surface view.	229
14.19	Liver metastases from gastric carcinoma, gross view of the cut section.	230
14.20	Liver metastases from pancreatic carcinoma, histology.	231
14.21	Liver infiltrate by chronic lymphocytic leukemia (CLL), histology.	232
14.22	Carcinoma of gall bladder, gross features.	233
14.23	Carcinoma of the cystic duct associated with mucocele of the gall bladder.	234
14.24	Adenocarcinoma of gall bladder, histology.	235
14.25	Rokitansky- Aschoff sinuses of the gall bladder, histology.	236
14.26	Cholecystitis glandularis proliferans, gross features.	237
14.27	Intrahepatic cholangiocarcinoma.	238
14.28	Hilar cholangiocarcinoma (Klatiskin tumor).	239
14.29	Hilar cholangiocarcinoma (Klatiskin tumor), histology.	240
14.30	Periampullary carcinoma, gross features.	241
14.31	Periampullary carcinoma, gross features.	242
14.32	Periampullary adenocarcinoma, histology.	243
14.33	Bile duct hamartoma.	244
14.34	Bile duct adenoma, histology.	245
14.35	Hydatid cyst of the liver (Echinococcus granulosum), gross features.	246
14.36	Carcinoma of head of pancreas, pancreatico-duodenectomy specimen (Whipple operation).	247
14.37	Adenocarcinoma of the pancreas, histology.	248
14.38	Microcystic serous neoplasm, gross features.	249
14.39	Intraduct papillary mucinous neoplasm, gross features.	250
14.40	Mucinous cystic neoplasm, gross features.	251
14.41	Solid-pseudopapillary neoplasm (solid cystic or Frantz tumor).	252
14.42	Chronic pancreatitis.	253

15	Tumors of urinary system	255
15.1	Renal cell carcinoma, clear cell type.	256
15.2	Renal cell carcinoma, clear cell type.	257
15.3	Papillary carcinoma of kidney	258

15.4	Gross features of oncocytoma and collecting duct carcinoma of Bellini.	259
15.5	Histology of renal cell carcinoma, clear cell type.	260
15.6	Variants of renal cell carcinoma.	261
15.7	Renal cell carcinoma, clear cell type complicating renal dialysis	262
15.8	Renal cell carcinoma, clear cell type, electron microscopy.	263
15.9	Histology of papillary carcinoma.	264
15.10	Chromophobe renal cell carcinoma.	265
15.11	Chromophobe cell carcinoma, electron microscopy.	266
15.12	Histology of oncocytoma.	267
15.13	Oncocytoma, electron microscopy.	268
15.14	Histology of collecting duct carcinoma of Bellini.	269
15.15	Histology of papillary adenoma.	270
15.16	Histology of Juxtaglomerular cell tumor.	271
15.17	Juxtaglomerular cell tumor, electron microscopy.	272
15.18	Xanthogranulomatous pyelonephritis.	273
15.19	Renal cystic nephroma.	274
15.20	The histology of renal angiomyolipoma.	275
15.21	Gross features of multicentric urothelial carcinoma of renal pelvis and upper ureter,	276
15.22	Gross features of urothelial carcinoma of renal pelvis.	277
15.23	Non-papillary diffusely infiltrating tumor, associated with calculi.	278
15.24	Transitional carcinoma of ureter.	279
15.25	Gross features of Wilms tumor.	280
15.26	Histology of Wilms tumor.	281
15.27	Histology of congenital mesoblastic nephroma.	282
15.28	Histology of renal clear cell sarcoma.	283
15.29	Rhabdoid tumor of kidney.	284
15.30	Rhabdoid tumor, electron microscopy.	285
15.31	Metanephric adenoma.	286
15.32	Metanephric adenofibroma.	287
15.33	Nephrogenic rests.	288
15.34	Renal dysplasia, histology.	289
15.35	Polycystic kidney (infantile type).	290
15.36	Gross feature of bladder cancer.	291
15.37	Gross appearance of verrucous carcinoma.	292
15.38	Gross features of verrucoid carcinoma of bladder.	293
15.39	Gross features of bladder cancer.	294
15.40	Multiple bladder carcinomas.	295
15.41	Squamous metaplasia (transdifferentiation) of urothelium.	296
15.42	Cystitis cystica of urinary bladder.	297

15.43	Cystitis glandularis of surface urothelium.	298
15.44	Histology of squamous dysplasia of urothelium.	299
15.45	Histology of carcinoma in situ.	300
15.46	Histology of carcinoma in situ, pagetoid type.	301
15.47	Histology of carcinoma in situ, undermined type.	302
15.48	Histology of carcinoma in situ, clinging type.	303
15.49	Histology of inverted papilloma.	304
15.50	Papillary urothelial neoplasm of low malignant potential.	305
15.51	Histology of papillary transitional cell carcinoma, grade 1.	306
15.52	Histology of papillary transitional cell carcinoma, grade 2.	307
15.53	Histology of transitional cell carcinoma, grade 3.	308
15.54	Histology of transitional cell carcinoma with metaplasia.	309
15.55	Angioinvasion.	310
15.56	Histology of squamous cell carcinoma.	311
15.57	Squamous cell carcinoma positive for p53.	312
15.58	Histology of verrucous carcinoma.	313
15.59	Adenocarcinoma, histologic subtypes.	314
15.60	Mesonephric adenocarcinoma of bladder.	315
15.61	Undifferentiated spindle cell carcinoma of bladder.	316
15.62	Carcinosarcoma of bladder.	317
15.63	Embryonal rhabdomyosarcoma of infancy, botryoid type.	318
15.64	Undifferentiated small cell carcinoma.	319
15.65	Malignant melanoma of bladder.	320
15.66	Histology of bilharzial granuloma.	321
15.67	Condyloma of the urinary bladder.	322
15.68	Mesonephric remnants in bladder.	323
15.69	Urachal remnants in bladder.	324
15.70	Bladder carcinoma invading contagious structures.	325
15.71	Bladder carcinoma invading non-contagious structures.	326
15.72	Papillary transitional carcinoma cluster, cytology.	327
15.73	Urine cytology, squamous cell carcinoma.	328
15.74	Urine cytology, adenocarcinoma.	329
15.75	Urine cytology, undifferentiated round cell carcinoma.	330
15.76	Urine cytology, S. hematobium.	331

16	Tumors of male genital organs	333
16.1	Prostatic adenocarcinoma.	334
16.2	Nodular hyperplasia.	335
16.3	High grade prostatic intraepithelial neoplasia (PIN), histology.	336

16.4	High grade prostatic intraepithelial neoplasia, histology.	337
16.5	Acinar adenocarcinoma, Gleason grade 1.	338
16.6	Acinar adenocarcinoma, Gleason grade 2, high power.	339
16.7	Acinar adenocarcinoma, Gleason grade 3.	340
16.8	Acinar adenocarcinoma, Gleason grade 4.	341
16.9	Acinar adenocarcinoma, Gleason grade 5, high power.	342
16.10	Acinar adenocarcinoma, Gleason grade 3, immunostaining.	343
16.11	Ductal adenocarcinoma, histology.	344
16.12	Transitional cell (urothelial) carcinoma, histology.	345
16.13	Basaloid carcinoma, histology.	346
16.14	Small cell carcinoma, histology.	347
16.15	Prostatic atrophy, histology.	348
16.16	Basal cell hyperplasia, histology.	349
16.17	Granulomatous prostatitis, histology.	350
16.18	Prostatic infarction, histology.	351
16.19	Intratubular germ cell neoplasia (IGCN), histology.	352
16.20	Seminoma.	353
16.21	Seminoma, PLAP immunostaining.	354
16.22	Embryonal carcinoma.	355
16.23	Dermoid cyst.	356
16.24	Immature teratoma.	357
16.25	Choriocarcinoma, gross appearance.	358
16.26	Choriocarcinoma, histology.	359
16.27	Yolk sac tumor, histology.	360
16.28	Leydig cell tumor, histology.	361
16.29	Leydig cell tumor of adrenogenital syndrome, histology.	362
16.30	Sertoli cell tumor, histology.	363
16.31	Teratocarcinoma, grossly.	364
16.32	Teratocarcinoma, histology.	365
16.33	Polyembryoma, histology.	366
16.34	Gonadoblastoma, histology.	367
16.35	Adenomatoid tumor, histology.	368
16.36	Fibrous pseudotumor, gross appearance.	369
16.37	Condyloma acuminatum (genital wart). Histology.	370
16.38	Advanced penile cancer, clinical appearance.	371
16.39	Erythroplasia of Queyrat, histology.	372
16.40	Bowen disease, histology.	373
16.41	Squamous cell carcinoma, histology.	374
16.42	Transitional cell carcinoma of the penile urethra, gross appearance.	375

17 Gynecologic malignancies	377
17.1 Ovary, benign serous cystadenoma, gross features.	378
17.2 Ovary, benign serous cystadenoma, histology.	379
17.3 Ovary, benign serous papillary cystadenofibroma, histology.	380
17.4 Ovary, benign serous adenofibroma, histology.	381
17.5 Ovary, serous borderline tumor, histology.	382
17.6 Ovary, serous cystadenocarcinoma.	383
17.7 Papillary serous adenocarcinoma, gross features.	384
17.8 Ovary, benign mucinous cystadenoma, histology.	385
17.9 Ovary, borderline mucinous neoplasm, histology.	386
17.10 Ovary, mucinous adenocarcinoma.	387
17.11 Association of ovarian mucinous carcinoma and endometrial carcinoma, gross appearance.	388
17.12 Ovary, Brenner tumor, histology.	389
17.13 Ovary, malignant Brenner tumor, histology.	390
17.14 Ovary, endometrioid adenocarcinoma, histology.	391
17.15 Association of bilateral ovarian endometrioid carcinoma with endometrial carcinoma, gross.	392
17.16 Ovary, clear cell carcinoma, histology.	393
17.17 Ovary, mature cystic teratoma (dermoid cyst), gross features.	394
17.18 Ovary, mature cystic teratoma, histology.	395
17.19 Ovary, monodermal teratoma, struma ovarii, histology.	396
17.20 Ovary, monodermal teratoma, carcinoid tumor, histology.	397
17.21 Immature teratoma, histology. Diagnostic criteria of malignancy include:	398
17.22 Ovary, dysgerminoma, gross features.	399
17.23 Ovary, dysgerminoma, histology.	400
17.24 Ovary, embryonal carcinoma, histology.	401
17.25 Ovary, yolk sac tumor, histology.	402
17.26 Ovary, choriocarcinoma, histology.	403
17.27 Ovary, adult granulosa cell tumor.	404
17.28 Ovary, juvenile granulosa cell tumor.	405
17.29 Ovary, granulosa-theca tumor, histology.	406
17.30 Ovary, Sertoli cell tumor, histology.	407
17.31 Ovary, Sertoli-Leydig tumor, histology.	408
17.32 Ovary, fibroma, gross features.	409
17.33 Ovary, steroid or lipid-cell tumor, histology.	410
17.34 Ovary, gonadoblastoma, histology.	411
17.35 Ovary, mllerian carcinosarcoma, histology.	412
17.36 Ovary, primary non-Hodgkin lymphoma, gross features.	413
17.37 Ovary, Krukenberg's tumor, histology.	414
17.38 Vulva, condyloma acuminatum, histology.	415

17.39 Vulva, lichen sclerosis et atrophicus, histology.	416
17.40 Vagina, squamous cell carcinoma, gross features.	417
17.41 Vagina, primary clear cell adenocarcinoma, histology.	418
17.42 Vagina, sarcoma botryoides (embryonal rhabdomyosarcoma), gross features.	419
17.43 Uterine cervix, normal thickness of epithelium and glands.	420
17.44 Endocervix, basal cell hyperplasia, histology.	421
17.45 Ectocervix, condyloma, histology.	422
17.46 Ectocervix, mild dysplasia, histology.	423
17.47 Ectocervix, marked dysplasia, histology.	424
17.48 Cervical carcinoma in situ, histology, low power.	425
17.49 Cervical carcinoma in situ, histology.	426
17.50 Cervical carcinoma in situ, histology.	427
17.51 Uterine cervix, carcinoma, gross features.	428
17.52 Uterine cervix, early invasive squamous cell carcinoma, histology.	429
17.53 Cervix, squamous cell carcinoma, keratinizing type, histology.	430
17.54 Cervix, squamous cell carcinoma, large cell non-keratinizing subtype, histology.	431
17.55 Endocervix, invasive adenocarcinoma, histology.	432
17.56 Endocervix, adenoma malignum, histology.	433
17.57 Endocervix, clear cell carcinoma, histology.	434
17.58 Endocervix, adenosquamous carcinoma, histology.	435
17.59 Endocervix, mesonephric adenocarcinoma, histology.	436
17.60 Endocervix, microglandular adenosis, histology.	437
17.61 Squamous metaplasia of endocervix, histology.	438
17.62 Endocervix, tunnel clusters, histology.	439
17.63 Endocervix, ectopic decidual tissue, histology.	440
17.64 Endometrial adenocarcinoma, endometrioid, type I.	441
17.65 Endometrioid carcinoma with squamous metaplasia, histology.	442
17.66 Endometrial carcinoma, serous, type II, histology.	443
17.67 Endometrial carcinoma, clear cell type, histology.	444
17.68 Endometrial hyperplasia, histology.	445
17.69 Atypical endometrial hyperplasia, histology.	446
17.70 Endometrial hyperplasia, Tamoxifen-related, histology.	447
17.71 Endometrial hyperplasia, intrauterine device-related, histology.	448
17.72 Myometrium, adenomyoma, histology.	449
17.73 Myometrium, adenofibroma, histology.	450
17.74 Myometrium, endometrial stromal sarcoma, low grade.	451
17.75 Myometrium, endometrial stromal sarcoma, histology of low grade tumor, high power.	452
17.76 Myometrium, leiomyosarcoma.	453
17.77 Myometrium, mllerian carcinosarcoma, histology.	454

17.78 Myometrium, mllerian adenosarcoma, histology.	455
17.79 Myometrium, leiomyomas, gross features.	456
17.80 Myometrium, leiomyoma, histology.	457
17.81 Myometrium, leiomyoma with bizarre nuclei (symplastic), histology.	458
17.82 Hydatidiform moles.	459
17.83 Invasive mole (chorioadenoma destruens).	460
17.84 Placental site trophoblastic tumor, histology.	461
17.85 Gestational choriocarcinoma, gross features.	462
17.86 Gestational choriocarcinoma, histology.	463

18 Breast cancer 465

18.1 CK Immunoreactivity.	466
18.2 Breast mammography.	467
18.3 Gross feature of comedo carcinoma of breast.	468
18.4 Histology of comedo carcinoma.	469
18.5 Histology of intraduct carcinoma, solid type.	470
18.6 Histology of intraduct cribriform carcinoma.	471
18.7 Intraduct carcinoma.	472
18.8 Gross appearance of Paget disease of nipple.	473
18.9 Histology of Paget disease of nipple.	474
18.10 Histology of lobular carcinoma in situ.	475
18.11 Histology of atypical ductal hyperplasia.	476
18.12 Gross appearance of invasive duct carcinoma.	477
18.13 Invasive duct carcinoma.	478
18.14 Gross feature of invasive lobular carcinoma.	479
18.15 Histology of invasive lobular carcinoma.	480
18.16 Histology of tubular carcinoma.	481
18.17 Histology of mucinous carcinoma.	482
18.18 Histology of papillary carcinoma of breast.	483
18.19 Adenoid cystic carcinoma.	484
18.20 Medullary carcinoma.	485
18.21 So-called Atypical medullary carcinoma.	486
18.22 Aggressive variants of duct carcinoma.	487
18.23 Sclerosing adenosis.	488
18.24 Radial scar.	489
18.25 Microglandular adenosis.	490
18.26 Tubular adenoma.	491
18.27 Intraduct papilloma	492
18.28 Healing papillomas of terminal lactiferous ducts.	493

18.29 ER positive reaction in invasive duct carcinoma.	494
18.30 Her-2 scoring system for breast carcinoma.	495
18.31 Interpectoral (Rotter) lymph node.	496
18.32 Inflammatory breast cancer.	497
18.33 Angioinvasion of breast carcinoma.	498
18.34 Cellular fibroadenoma.	499
18.35 Phyllodes tumor, low grade.	500
18.36 Histology of phyllodes tumor, high grade.	501
18.37 Gross appearance of Phyllodes tumor at initial presentation.	502
18.38 Gross appearance of recurrent phyllodes tumor.	503
18.39 Pseudoangiomatous stromal hyperplasia.	504
18.40 Periductal stromal sarcoma of the breast.	505
18.41 Malignant myoepithelioma of the breast.	506
18.42 Hemangiosarcoma of the breast.	507
18.43 Gross appearance of myxoliposarcoma.	508

19 Endocrine and neuroendocrine tumors 509

19.1 Papillary carcinoma, gross features.	510
19.2 Papillary carcinoma of thyroid, gross features.	511
19.3 Papillary carcinoma, gross features.	512
19.4 Papillary carcinoma, gross features.	513
19.5 Follicular carcinoma of thyroid, gross features.	514
19.6 Papillary carcinoma, histology.	515
19.7 Papillary carcinoma, histology of sclerosing variant.	516
19.8 Papillary carcinoma, histology of oncocytic trabecular variant.	517
19.9 Papillary carcinoma, histology of the follicular variant.	518
19.10 Papillary carcinoma, histology of the tall cell variant.	519
19.11 Follicular carcinoma, histology of widely invasive subtype.	520
19.12 Follicular carcinoma, histology of clear cell variant.	521
19.13 Follicular carcinoma, angioinvasion of the internal jugular vein.	522
19.14 Follicular carcinoma, histology of angioinvasion.	523
19.15 Hurtle cell (oncocytic) carcinoma, histology.	524
19.16 Insular pattern (insula= islands) of follicular carcinoma, histology.	525
19.17 Undifferentiated (anaplastic) carcinoma, histology.	526
19.18 Medullary carcinoma, histology.	527
19.19 Medullary carcinoma, histochemistry.	528
19.20 C-cell hyperplasia in MEN syndrome.	529
19.21 Papillary carcinoma of thyroid, fine needle aspiration cytology.	530
19.22 Follicular lesions of thyroid, fine needle aspiration cytology.	531

19.23 Follicular adenoma, gross features.	532
19.24 Follicular adenoma, histology.	533
19.25 Follicular adenoma, histology of signet ring variant.	534
19.26 Nodular hyperplasia of thyroid.	535
19.27 Nodular hyperplasia, histology of pseudopapillary pattern.	536
19.28 Dyshormonogenetic goiter.	537
19.29 Chronic lymphocytic thyroiditis (Hashimoto's disease).	538
19.30 Granulomatous thyroiditis (de-Quervain disease).	539
19.31 Thyroid teratoma, gross features.	540
19.32 Parathyroid hyperplasia.	541
19.33 Parathyroid adenoma.	542
19.34 Parathyroid carcinoma.	543
19.35 Adrenal cortical nodular hyperplasia, histology.	544
19.36 Adrenal cortical adenoma, gross features.	545
19.37 Adrenal cortical adenoma, histology.	546
19.38 Adrenal cortical carcinoma, gross features.	547
19.39 Adrenal cortical carcinoma, histology.	548
19.40 Anterior pituitary gland, growth-hormone producing adenoma.	549
19.41 Anterior pituitary adenoma, prolactin producing.	550
19.42 Anterior pituitary null adenoma, histology.	551
19.43 Adrenal pheochromocytoma, gross features.	552
19.44 Pheochromocytoma, histology.	553
19.45 Pheochromocytoma, immunophenotyping.	554
19.46 Neuroblastoma, histology.	555
19.47 Ganglioneuroblastoma, histology.	556
19.48 Ganglioneuroma, histology.	557
19.49 Adrenal myelolipoma, histology	558
19.50 Pancreatic glucagonoma.	559
19.51 WHO classification of neuroendocrine tumors.	560
19.52 Neuroendocrine tumors, electron microscopy.	561

20 Malignant bone tumors 563

20.1 Osteosarcoma, central conventional type.	564
20.2 Osteosarcoma, Codman triangle.	565
20.3 Osteosarcoma, histology.	566
20.4 Osteosarcoma, telangiectatic type, histology.	567
20.5 Osteosarcoma, small cell type (osteolytic type).	568
20.6 Osteosarcoma, fibroblastic type.	569
20.7 Osteosarcoma of femur, sclerosing type.	570

20.8	Osteosarcoma, sclerosing type, histology.	571
20.9	Parosteal osteosarcoma.	572
20.10	Parosteal osteosarcoma, histology.	573
20.11	Periosteal osteosarcoma (juxtacortical), histology.	574
20.12	Osteosarcoma on top of Paget disease.	575
20.13	Aggressive osteoblastoma of metatarsal bone.	576
20.14	Myositis ossificans.	577
20.15	Myositis ossificans, histology of maturation phenomenon.	578
20.16	Callus of ununited fracture, histology.	579
20.17	Osteoid osteoma of femur.	580
20.18	Fibrous and osteofibrous dysplasia, histology.	581
20.19	Aneurysmal bone cyst, histology.	582
20.20	Chondrosarcoma of ribs, gross features.	583
20.21	Chondrosarcoma of pelvis, radiography.	584
20.22	Chondrosarcoma of upper femur, radiography.	585
20.23	Chondrosarcoma grade 1, histology.	586
20.24	Chondrosarcoma grade 2, histology.	587
20.25	Chondrosarcoma grade 3, histology.	588
20.26	Dedifferentiated chondrosarcoma, histology.	589
20.27	Chondrosarcoma, clear cell type, histology.	590
20.28	Mesenchymal chondrosarcoma, histology.	591
20.29	Enchondroma of thumb, radiography.	592
20.30	Osteochondroma.	593
20.31	Chondroblastoma.	594
20.32	Chondromyxoid fibroma.	595
20.33	Ewing sarcoma of tibia.	596
20.34	Ewing sarcoma, histology.	597
20.35	Desmoplastic fibroma, histology.	598
20.36	Fibrosarcoma, histology.	599
20.37	Malignant fibrous histiocytoma, histology.	600
20.38	Giant cell tumor of distal end of femur.	601
20.39	Giant cell tumor, histology.	602
20.40	Giant cell lesion of hyperparathyroidism (osteitis fibrosa cystica).	603
20.41	Primary non-Hodgkin lymphoma of femur.	604
20.42	Plasmacytoma, histology.	605
20.43	Chordoma, histology.	606
20.44	Adamantinoma of tibia, histology.	607
20.45	Bone metastases, radiography.	608
20.46	Sclerotic metastases from duct carcinoma of breast, histology.	609

20.47 Sclerotic metastases from lobular carcinoma of breast, histology.	610
20.48 Osteolytic bone metastases from renal carcinoma, clear cell type.	611
21 Soft tissue and peripheral neuroectodermal tumors,	613
21.1 Fibromatosis, gross features of abdominal desmoid tumor.	614
21.2 Fibromatosis, histology.	615
21.3 Fibrosarcoma and its variants.	616
21.4 Fibrosarcoma, electron microscopic (EM) features.	617
21.5 Inflammatory myofibroblastic tumor.	618
21.6 Fibrous proliferations in infancy.	619
21.7 Keloid after surgery.	620
21.8 Nodular fasciitis.	621
21.9 Benign fibrous histiocytoma (dermatofibroma).	622
21.10 Giant cell tumor of tendon sheath.	623
21.11 Pleomorphic undifferentiated sarcoma/Pleomorphic MFH.	624
21.12 Atypical lipomatous tumor (well-differentiated liposarcoma).	625
21.13 Myxoliposarcoma.	626
21.14 Round cell liposarcoma.	627
21.15 Pleomorphic liposarcoma.	628
21.16 Lipoblastoma.	629
21.17 Spindle cell / pleomorphic lipoma.	630
21.18 Embryonal rhabdomyosarcoma, gross appearance.	631
21.19 Embryonal rhabdomyosarcoma, histology.	632
21.20 Botryoid rhabdomyosarcoma, histology.	633
21.21 Alveolar rhabdomyosarcoma, histology.	634
21.22 Pleomorphic rhabdomyosarcoma, gross appearance.	635
21.23 Pleomorphic rhabdomyosarcoma, histology.	636
21.24 Rhabdomyosarcoma, electron microscopic features.	637
21.25 Proliferative myositis.	638
21.26 Leiomyosarcoma.	639
21.27 Leiomyosarcoma, electron microscopic features.	640
21.28 Hemangioendothelioma.	641
21.29 Angiosarcoma, gross features.	642
21.30 Angiosarcoma, histology.	643
21.31 Perivascular tumors.	644
21.32 Primitive neuroectodermal tumor (Ewing / PNET).	645
21.33 Neuroepithelioma.	646
21.34 Neuroblastoma, histology.	647
21.35 Paraganglioma.	648

21.36 Malignant peripheral nerve sheath tumor (MPNST) of sciatic nerve, gross features.	649
21.37 Malignant peripheral nerve sheath tumor, histology.	650
21.38 Malignant peripheral nerve sheath tumor (MPNST), electron microscopic features.	651
21.39 Malignant granular cell tumor of thigh.	652
21.40 Neurofibroma.	653
21.41 Monophasic synovial sarcoma, histology, low power.	654
21.42 Synovial sarcoma, histology.	655
21.43 Alveolar soft part sarcoma.	656
21.44 Alveolar soft part sarcoma, electron microscopic features.	657
21.45 Epithelioid sarcoma, histology.	658
21.46 Desmoplastic round cell tumor (DRCT), histology.	659
21.47 Myxoma, histology.	660
21.48 Ossifying fibromyxoid tumor, histology.	661
21.49 Perivascular epithelioid cell tumor (PECOMA), histology.	662
22 Skin tumors	663
22.1 Xeroderma pigmentosum.	664
22.2 Multiple basal cell carcinomas in an albino patient.	665
22.3 Basal cell carcinoma.	666
22.4 Basal cell carcinoma, nodular type.	667
22.5 Basal cell carcinoma, superficial type.	668
22.6 Basal cell carcinoma, infiltrating morpheiform type.	669
22.7 Keratotic basal cell carcinoma.	670
22.8 Basosquamous cell carcinoma, histology.	671
22.9 Fibroepithelial basal cell carcinoma, histology.	672
22.10 Adenoid variant of basal cell carcinoma, histology.	673
22.11 Seborrheic keratosis.	674
22.12 Trichoblastoma, histology.	675
22.13 Solar keratosis.	676
22.14 Squamous carcinoma in situ (Bowen disease), low power histology.	677
22.15 Squamous cell carcinoma in situ (Bowen disease), high power histology.	678
22.16 Squamous cell carcinoma, skin of toes, gross features.	679
22.17 Squamous cell carcinoma of parotid region, gross features.	680
22.18 Microinvasive squamous cell carcinoma, histology.	681
22.19 Invasive squamous cell carcinoma, histology.	682
22.20 Verrucous squamous cell carcinoma, histology.	683
22.21 Keratoacanthoma, gross features.	684
22.22 Keratoacanthoma, histology.	685
22.23 Acantholytic squamous cell carcinoma, histology.	686

22.24 Sarcomatoid squamous cell carcinoma, immunohistochemistry.	687
22.25 Squamous cell carcinoma, electron microscopic features	688
22.26 Pseudoepitheliomatous hyperplasia, histology.	689
22.27 Condyloma acuminatum.	690
22.28 Verruca vulgaris, histology.	691
22.29 Proliferating pilar cyst, histology.	692
22.30 Poroma, histology.	693
22.31 Syringoma, histology.	694
22.32 Hidradenoma, histology.	695
22.33 Syringocystadenoma papilliferum, histology.	696
22.34 Cyndroma (turban tumor), histology.	697
22.35 Sebaceous adenoma, histology.	698
22.36 Trichilemmoma, histology.	699
22.37 Trichoepithelioma.	700
22.38 Pilomatricoma, histology.	701
22.39 Microcystic adnexal carcinoma (sweat gland carcinoma), histology.	702
22.40 Adenoid cystic carcinoma of sweat glands, histology.	703
22.41 Mucinous adenocarcinoma of sweat glands, histology.	704
22.42 Paget's disease of skin, histology.	705
22.43 Sebaceous carcinoma, histology.	706
22.44 Proliferating pilar tumor, histology.	707
22.45 Merkel cell carcinoma, histology.	708
22.46 Dysplastic nevus syndrome, clinical picture.	709
22.47 Dysplastic nevus syndrome, histology.	710
22.48 Congenital giant hairy nevus, clinical picture.	711
22.49 Malignant melanoma, gross features.	712
22.50 Malignant melanoma, histology.	713
22.51 Amelanotic melanoma, electron microscopy.	714
22.52 Malignant melanoma, electron microscopic features,	715
22.53 Lentigo maligna, histology.	716
22.54 Superficial spreading melanoma, gross features.	717
22.55 Malignant melanoma, superficial spreading type, histology.	718
22.56 Nodular melanoma, histology.	719
22.57 Lentigo maligna melanoma, clinical picture.	720
22.58 Acral melanoma.	721
22.59 Amelanotic melanoma, histology.	722
22.60 Malignant blue nevus, histology.	723
22.61 Balloon cell melanoma, histology.	724
22.62 Juvenile spindle cell nevus of Spitz, histology.	725

22.63	Blue nevus.	726
22.64	Blue nevus, histology.	727
22.65	Compound nevus.	728
22.66	Dermatofibrosarcoma protuberans, gross features.	729
22.67	Dermatofibrosarcoma protuberans, histology.	730
22.68	Kaposi sarcoma, histology, low power.	731
22.69	Kaposi sarcoma, histology, high power.	732
22.70	Classic Kaposi sarcoma, clinical picture.	733
22.71	Kaposi sarcoma in AIDS patient.	734
22.72	Mycosis fungoides.	735
22.73	Primary cutaneous B-cell lymphoma, histology.	736
22.74	Reactive lymphoid hyperplasia, histology.	737
22.75	Gardner syndrome.	738
22.76	Peutz-Jeghers syndrome.	739
22.77	Neurofibromatosis Type I (von Recklinghausen disease).	740
22.78	Cowden syndrome.	741
22.79	Tuberous sclerosis.	742
22.80	Gorlin syndrome (Nevoid basal cell carcinoma syndrome).	743
22.81	Ataxia-telangiectasia (Louis-Bar syndrome)	744
22.82	Acanthosis nigricans.	745
22.83	Seborrheic keratosis.	746
22.84	Primary systemic amyloidosis	747

23 Tumors of central nervous system 749

23.1	Pilocytic astrocytoma	750
23.2	Medulloblastoma	751
23.3	MRI neuroimaging, tumor localization.	752
23.4	MRI neuroimaging, tumor morphology.	753
23.5	Diffuse astrocytoma.	754
23.6	Gemistocytic astrocytoma, WHO grade II histology and immunophenotyping.	755
23.7	Pilocytic astrocytoma, histology.	756
23.8	Pleomorphic xanthoastrocytoma, WHO grade II, histology.	757
23.9	Anaplastic astrocytoma, WHO grade III, histology.	758
23.10	Glioblastoma multiforme, WHO grade IV.	759
23.11	Glioblastoma multiforme, WHO grade IV.	760
23.12	Other high grade astrocytomas.	761
23.13	Oligodendroglioma, WHO grade II, histology.	762
23.14	Ependymoma, WHO grade II.	763
23.15	Anaplastic ependymoma, WHO grade III, IV, histology.	764

23.16 Ependymoma, electron microscopic features.	765
23.17 Subependymoma, WHO grade I, histology,	766
23.18 Myxopapillary ependymoma, WHO grade I.	767
23.19 Choroid plexus papilloma.	768
23.20 Neurocytoma, WHO grade II.	769
23.21 Medulloblastoma, classic type, WHO grade IV, histology.	770
23.22 Medulloepithelioma, WHO grade IV, histology.	771
23.23 Gliosis, histology.	772
23.24 Mixed glioma, oligoastrocytoma, low grade, WHO grade II.	773
23.25 Ganglioglioma, histology.	774
23.26 Dysembryoplastic neuroepithelial tumor, WHO grade I, histology.	775
23.27 Mixed glioma, gliosarcoma, histology.	776
23.28 Meningioma.	777
23.29 Other grade I meningiomas.	778
23.30 Chordoid meningioma, WHO grade II, histology.	779
23.31 Malignant meningioma, WHO grade III, histology.	780
23.32 Meningioma invading bone, histology.	781
23.33 Meningioma, electron microscopic features.	782
23.34 Melanocytoma	783
23.35 Hemangioblastoma, WHO grade I, histology.	784
23.36 Pineal tumors, histology.	785
23.37 Craniopharyngioma, histology.	786
23.38 Primary lymphoma of brain, histology.	787
23.39 Metastases.	788
24 Tumors of special senses	789
24.1 Basal cell carcinoma of eye lid.	790
24.2 Histology of normal conjunctiva.	791
24.3 Histology of normal conjunctiva.	792
24.4 Benign conjunctival compound nevus, histology.	793
24.5 Benign conjunctival nevus, histology.	794
24.6 Cystic compound nevus of conjunctiva, histology.	795
24.7 Squamous cell carcinoma in situ of conjunctiva (Bowen disease), histology.	796
24.8 Malignant melanoma of conjunctiva, histology.	797
24.9 Choroidal malignant melanoma, gross features, enucleation specimen.	798
24.10 Choroidal malignant melanoma, histology of subtypes.	799
24.11 Retinoblastoma, rosettes, histology.	800
24.12 Retinoblastoma grading, histology.	801
24.13 Retinal hamartoma, histology.	802

24.14 Lacrimal gland, adenoid cystic carcinoma, histology.	803
24.15 Optic nerve pilocytic astrocytoma (so-called optic glioma), histology.	804
24.16 Rhabdomyosarcoma of orbit, histology.	805
24.17 Large cell non-Hodgkin lymphoma of orbit.	806
24.18 Pseudolymphoma of orbit, histology.	807
24.19 Ceruminous adenoma of external auditory canal, histology.	808
24.20 Cholesteatoma of middle ear, histology.	809
24.21 Upper jugular paraganglioma, (glomus jugulare), histology.	810
24.22 Schwannoma (acoustic neuroma), histology.	811
24.23 Schwannoma, symplastic change, histology.	812
24.24 Meningioma of internal ear, histology.	813
24.25 Endolymphatic sac tumor of internal ear, histology.	814

25 Hematolymphoid malignancies 815

25.1 Nodular lymphocyte predominance Hodgkin lymphoma.	816
25.2 Nodular lymphocyte predominance Hodgkin lymphoma, CD20 immunostain.	817
25.3 Hodgkin lymphoma, nodular sclerosis.	818
25.4 Hodgkin lymphoma, nodular sclerosis.	819
25.5 Hodgkin lymphoma, mixed cellularity.	820
25.6 Hodgkin lymphoma, lymphocyte depletion (a rare subtype).	821
25.7 Hodgkin lymphoma, immunostaining of classic Reed-Sternberg giant cells.	822
25.8 Small lymphocytic NHL, histology.	823
25.9 Small lymphocytic lymphoma, plasmacytoid type, histology.	824
25.10 Lymphoplasmacytic lymphoma, electron microscopic features.	825
25.11 Lymphoplasmacytic lymphoma, histology.	826
25.12 Gastric marginal zone lymphoma (H. pylori related MALT lymphoma).	827
25.13 Follicular lymphoma, histology.	828
25.14 Follicular lymphoma.	829
25.15 Grading of follicular lymphoma.	830
25.16 Diffuse large B-cell lymphoma (DLBCL).	831
25.17 T-cell rich B-cell Non Hodgkin lymphoma.	832
25.18 Mantle cell lymphoma, histology.	833
25.19 Anaplastic large cell lymphoma, histology.	834
25.20 Peripheral T-cell NHL, histology.	835
25.21 Angioimmunoblastic lymphoma.	836
25.22 Extranodal NK/T-cell lymphoma, nasal type (formerly angiocentric lymphoma).	837
25.23 Extranodal NK/T -cell lymphoma, nasal type.	838
25.24 Epithelioid cell rich T-cell lymphoma (Lennert's type).	839
25.25 Lymphoblastic lymphoma, histology.	840

25.26	Burkitt lymphoma, histology.	841
25.27	Multiple myeloma, radiographic features.	842
25.28	Multiple myeloma (MM).	843
25.29	Lymphoplasmacytic lymphoma, secretory, histology.	844
25.30	Follicular reactive hyperplasia of lymph node.	845
25.31	Castleman disease, hyaline vascular type, the most common (90%).	846
25.32	Castleman disease, plasma cell type.	847
25.33	Progressive transformation of germinal center.	848
25.34	Toxoplasmosis follicular hyperplasia.	849
25.35	Infectious mononucleosis (EBV infection).	850
25.36	Kikuchi necrotizing lymphadenitis.	851
25.37	Small round cell neuroectodermal tumors.	852
25.38	Large cell undifferentiated nasopharyngeal carcinoma.	853
25.39	Extramedullary hematopoiesis, histology.	854
25.40	Myeloid neoplasms and leukemias.	855
25.41	Langerhans cell histiocytosis (eosinophilic granuloma), histology.	856
25.42	Chronic idiopathic myelofibrosis, late phase.	857
25.43	Cytomorphology of leukemias, Giemsa stained smears.	858
25.44	Patterns of bone marrow involvement by non-Hodgkin lymphoma.	859
25.45	Chronic venous congestion of spleen complicating liver cirrhosis.	860
25.46	Hemolytic anemia (hereditary spherocytosis and sickle cell anemia), histology.	861
25.47	Thalassemia, histologic features in spleen.	862
25.48	Myeloid dysplasia in myelodysplastic syndrome (polycythemia vera).	863
25.49	Chronic myeloid leukemia (CML).	864
25.50	Hairy cell leukemia (characterized by splenomegaly with diffuse red color), histology.	865
25.51	Chronic lymphocytic leukemia/small lymphocytic lymphoma, gross features.	866
25.52	Marginal zone lymphoma of spleen.	867
25.53	Lymphangioma of spleen.	868
25.54	Littoral cell angioma, histology.	869
25.55	Hodgkin lymphoma of spleen.	870
25.56	Diffuse large B-cell non-Hodgkin lymphoma, gross features.	871

26 Histiocytic and dendritic tumors 873

26.1	Reactive sinus histiocytosis of lymph node, histology.	874
26.2	Sinus histiocytosis with massive lymphadenopathy in lymph node (Rosai-Dorfman disease), histology.	875
26.3	Hemophagocytic Lymphohistiocytosis, histology.	876
26.4	Gaucher disease, histology.	877
26.5	Langerhans cell histiocytosis (eosinophilic granuloma), radiography of the skull.	878
26.6	Langerhans cell histiocytosis (Letterer-Siwe disease).	879

26.7	Langerhans cell histiocytosis (Letterer-Siwe disease), histology.	880
26.8	Langerhans cell histiocytosis, histology.	881
26.9	Langerhans cell histiocytosis, histology.	882
26.10	Langerhans cell histiocytosis, electron microscopy.	883
26.11	Xanthoma of the eye lid, histology.	884
26.12	Juvenile xanthogranuloma of skin, histology.	885
26.13	Histiocytic sarcoma, histology.	886
26.14	Follicular dendritic cell sarcoma, histology.	887
26.15	Interdigitating dendritic cell sarcoma, histology.	888
